"Safety for Home Care" (via MAU) - UX Designer

Innovation Skåne, Malmö

Apr 2019 - May 2019

Kaländra is a multi-channel service which provides home care patients with three ways of requesting schedule change and receiving schedule change confirmations in their own accommodations.

A service proposal that provides a more transparent and less inconsistent communication method through holistic thinking. A design case which involves working with all related stakeholders to explore safety in the context of home care in Lönsboda.
